

Assignment 5

For this assignment take the forms that you created in assignment 4 and make sure to save the submitted data for the faculty entry and class entry forms into your mysql database on your webserver. Utilize the database you created in Assignment 3. This assignment you just need to insert data in to the database using your forms from assignment 4. You will place your code in a lastname_assignment5 folder and upload to both the istwebclass server as well as zip the folder and upload into D2L.
